## **For Developers:**

Kindly include a screenshot of the user interface and provide the relevant code snippet for the feature or task you are currently working on. This will help ensure proper documentation, transparency, and easier review of progress.

## **For QA:**

Please indicate the specific module you are currently testing and provide the status of the related test cases (e.g., Passed, Failed, In Progress). Additionally, list all blockers encountered during testing and attach the corresponding file link in the description for reference.

This will help maintain clear tracking, improve collaboration, and ensure timely resolution of issues.

## **Note:**

When creating or responding to emails, please ensure that only one email thread is used to facilitate better tracking and efficient monitoring of tasks.
