

End of the day Report

Name: Mark Andrie D. Datus	
Date: 05/08/2026	Position: Web Developer Intern

For Developers:

Kindly include a screenshot of the user interface and provide the relevant code snippet for the feature or task you are currently working on. This will help ensure proper documentation, transparency, and easier review of progress.

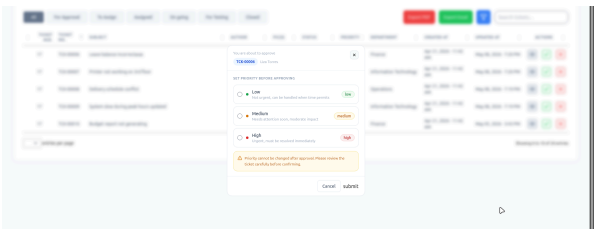

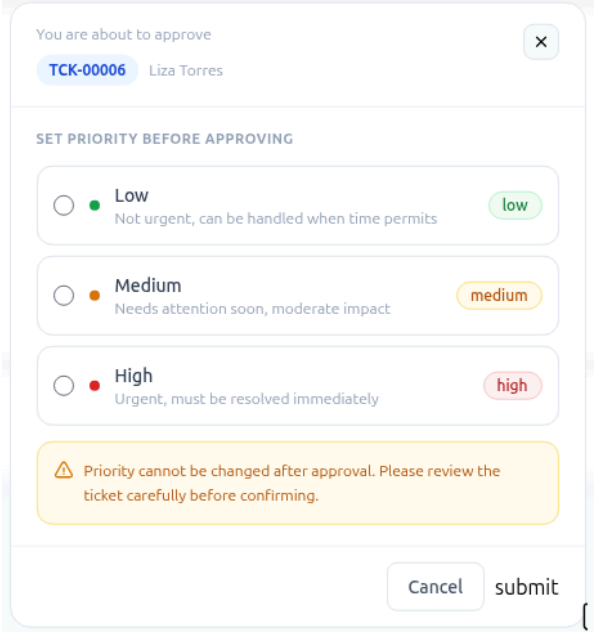

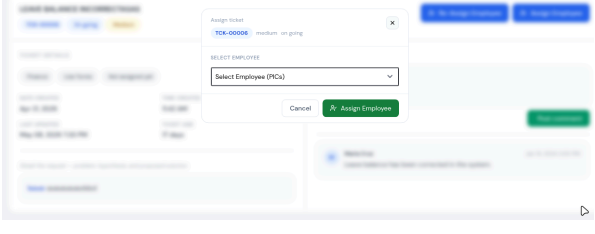

For QA:

Please indicate the specific module you are currently testing and provide the status of the related test cases (e.g., Passed, Failed, In Progress). Additionally, list all blockers encountered during testing and attach the corresponding file link in the description for reference.

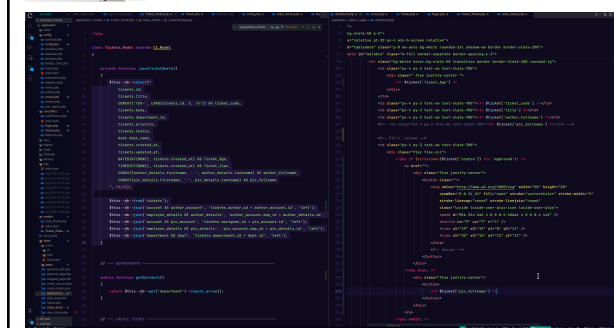

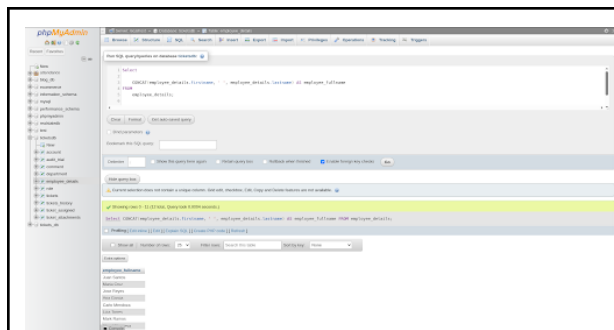

This will help maintain clear tracking, improve collaboration, and ensure timely resolution of issues.

Note:

When creating or responding to emails, please ensure that only one email thread is used to facilitate better tracking and efficient monitoring of tasks.

Activity	Description
  	Successful • Add a UI and logic for setting ticket priority. • Add a UI for assigning and reassigning employees. • Refactoring the Database • Fix the conditional logic for displaying the assign icon and the assigned employee's name On progress • Implement employee assignment. • Build the backend logic for assigning and reassigning employees. • Fix the conditional bug affecting the display of the assign icon on the "All" page.

	CODE SNIPPETS • Concatenate name values from the employee details table.
--	---

```

public function getEmployee()
{
    $this->db->select("id, CONCAT(employee_details.firstname, ' ', employee_details.lastname) AS empl");

    return $this->db->from('employee_details')->get()->result_array();
}

```

```

public function returnTicketDetails($id)
{
    $data['tckt_details'] = $this->Tickets_Model->getData_for_ticket_details($id);
    $data['departments'] = $this->Tickets_Model->getDepartments();
    $data['comments'] = $this->Tickets_Model->get_ticket_comments($id);
    $data['attachments'] = $this->Tickets_Model->get_ticket_attachments($id);
    $data['employee_fullname'] = $this->Tickets_Model->getEmployee();
    $this->load->view('pages/navbar');
    $this->load->view('pages/ticket_details', $data);
}

```

```

public function getEmpCtrlr()
{
    $data['employee_fullname'] = $this->Tickets_Model->getEmployee();
    $this->load->view('pages/navbar');
    $this->load->view('pages/ticket_details', $data);
}

```

- Refactor the raw SQL query into CodeIgniter's Query Builder format.
